

CAMPAS PROJECT

STRENGTHENING NATIONAL BIODIVERSITY AND FOREST CARBON STOCK CONSERVATION THROUGH LANDSCAPE-BASED COLLABORATIVE MANAGEMENT OF CAMBODIA'S PROTECTED AREA SYSTEM AS DEMONSTRATED IN THE EASTERN PLAINS LANDSCAPE(CAMPAS PROJECT)

JOB DESCRIPTION

I. Position Information

Job Title:	Project Volunteer
Reports to:	Project Manager
Contract Type:	Hired employee
Duration:	3 Months
Starting Date:	01 July 2020

II. Background

CAMPAS, short for 'Strengthening national biodiversity and forest carbon stock conservation through landscape-based collaborative management of Cambodia's protected area system as demonstrated in the Eastern Plains Landscape', is a project funded by GEF Trust Fund. As its title suggests, the project holds the interconnected aim to improve the sustainability of Cambodia's national system of protected areas, with the complementary objectives to mainstream biodiversity into production forests and promoting conservation of carbon stocks.

The project is delineated into two main components:

Component 1: Strengthened national vision and support for landscape-based protected area and forest management.

Component 2: Integrated landscape management to safeguard forests, biodiversity, and carbon stocks in the Eastern Plains Landscape.

The project design comprises two major outcomes, one at the national level and a supportive outcome at the demonstration site level. At the national level CAMPAS comprises three specific outputs, all oriented to strengthen unity and support for landscape-based protected area and forest management that explicitly addresses national system level issues through measures that include establishing the enabling environment at national level, through communications and awareness, strengthening protected area governance involving inter-agency cooperation, and demonstrating sustainable financing options. At the demonstration site level, the CAMPAS's four outputs will deliver a sub-regional planning approach for the Eastern Plains Landscape that integrates protected areas and biodiversity conservation into sustainable development – with specific focus on forested landscape connectivity. At this level it also focuses on integrating forest conservation with sub-regional economic development planning, trying to resolve issues presented by economic land concessions that often ignore and impact upon protected areas, and harnessing integration opportunities with other landscape-level initiatives like those of the Asian Development Bank Biodiversity Conservation Corridors and United Nations Environmental Program Adaptation Fund projects.

III. Functions / Key Results Expected

The Project Volunteer will ensure timely project delivery and transparent reporting, as well as compliance with project outcome and outputs. The volunteer will work closely with CAMPAS's Project Management Unit (CAMPAS-PMU), which will provide direct support to project implementation.

Responsibilities of Project volunteer include to:

- Assist the day-to-day project implementation;
- Assist project team and/ project consultant to collect and prepare the biodiversity research and publication
- Assist project team in preparing the project activities, ensuring efficiency and effectiveness;
- Assist project team in mobilizing all project inputs in accordance with procedures for project implementation;
- Assist activities closely with relevant academic and government institutions;
- Assist the project tam and implementing partners with development of essential skills through training workshops;
- Provide information as needed for other purposes or ad hoc requests (e.g. CAMPAS-PMU or donor request, publications, communication materials, etc...);
- Participate conference, meeting, seminars as required.

IV. Recruitment Qualifications

Education:	<ul style="list-style-type: none">• Bachelor degree or equivalent in sciences or management or relevant field.• Relevant qualification in project management desirable.
Competencies	<ul style="list-style-type: none">• Experience in the biodiversity and natural resource research
Language Requirements:	<ul style="list-style-type: none">• Be able to communicate in English (spoken and written)

Interested individuals should submit CV and Cover Letter to the Department of Biodiversity, Ministry of Environment: Morodok Techo Building (Lot 503) Tonle Bassac, Chamkarmon, Phnom Penh, Cambodia.
